

Stay out of the **DANGER ZONE** with the WSJ "Wolverine"

Let the "Wolverine" **safely** handle
your tough lifting jobs.

The WSJ "Wolverine" can burrow back into places as small as 9-1/4" x 6" and yet keep you up to 6 feet away from the lifting point. The rugged WSJ "Wolverine" Service Jack is a compact, 65-pound package of raw strength that lets you concentrate 50,000 pounds of lifting power at a single point. Give the dangerous, dirty work to the WSJ while you stay out from under the load.

- **Flexible Jacking Height**

From the 9-1/4" minimum, to 30-1/2" high
with the optional WSJ-E extension tubes.

- **Alloy Hardened Head**

- **Removable Hydraulic Cylinder**

The ram and hose detach
in seconds to let you push
in any direction.

- **Plated Shaft**

Nickle plating delivers
long service on critical
components.

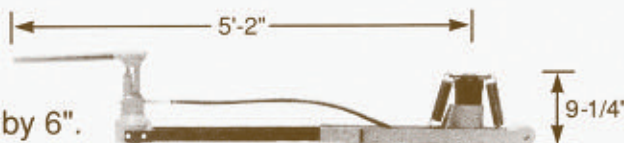

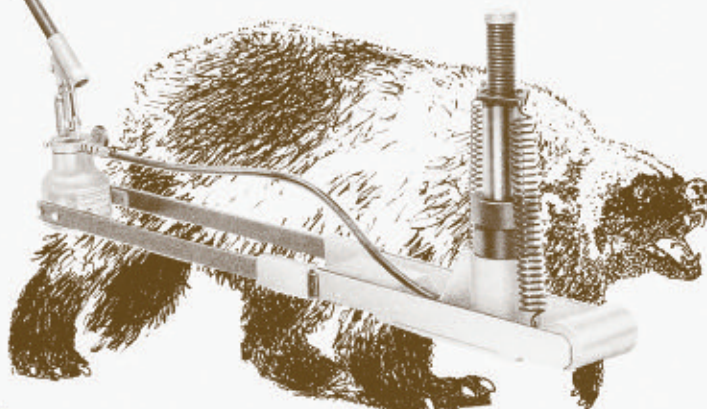

- **No Air Needed!**

- **Heavy Gauge Skid Plate**

Built to take years of
pounding and dragging
over gravel, concrete
and asphalt.

- **Low Clearance**

The WSJ can fit into spaces 9-1/4" by 6".

... A Combination of Bodily Strength, Amazing Courage, and Relentless Endeavor. . ."

Wolverine description from Audobon Society Encyclopedia, Vol. 16., ©1965

Tight Fits

The WSJ can squeeze under loads when there's very little room to maneuver.

High Lift Points

With the optional WSJ-E Extension Tube Set, the "Wolverine" can lift as high as 30-1/2 inches.

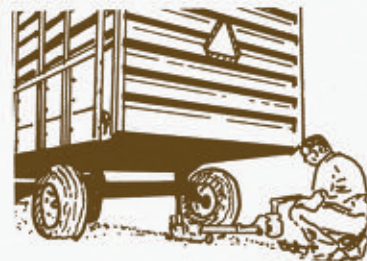

Like its extraordinary namesake, the Wolverine 25-Ton Service Jack has the proven ability to face tough odds and keep on working.

The WSJ is a rugged, compact, 65-pound bundle of exceptional lifting power that will stand up under years of heavy abuse with a spirit that never quits. In extreme heat and cold; in dust, dirt, sand, mud or gravel; in or out of the shop; on the road or off, you can depend on the Wolverine meeting every challenge.

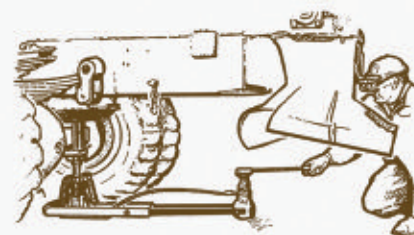

Multi-Directional Power

Detach the 25-ton ram and apply force in any direction.

Multi-Surface Stability

The WSJ provides excellent jacking stability even out in a field because of its unique sled base design.

Deep Reaching

No need to crawl under loads anymore! The WSJ is designed to keep you out of that dangerous and dirty area.
